

KARTA AI ENGAGEMENT WORKSPACE

Open Monday already knowing where your engagement stands.

Every Karta engagement gets its own AI-enabled workspace: the plan, the evidence, the decisions and the next step in one place, shaped by Karta's methodology, with a named person accountable for every output.

- ✓ **See where you stand**
The seven-stage Karta lifecycle with real dates, the next control point, and whether its evidence is ready.
- ✓ **Know what needs attention**
Slipped milestones, open decisions from last week's workshop, capacity gaps next week. Calculated from the sources, not typed in.
- ✓ **Do the week's work without rebuilding the context**
Status drafted, reviewed and built into the KCG deck. Sprint reviews, UAT scripts and onboarding briefs prepared from the same approved record.

ON THE SCREEN

LIVE today, for Legend **NEXT** the coming 90 days **LATER** on the roadmap

Real, and running. First workspace live for Legend on September 8, 2026. First Weekly Status approved and the deck built the next day. Set-up takes about ten minutes. **Under control by design:** every read runs as the person looking, a named reviewer approves, nothing is sent by software, and missing evidence is never shown as Green.

ASK CLAUDE

LIVE

What did we decide about allocations in Tuesday's workshop?

Allocations move to Phase 2 by client decision on Sep 16; the Phase 1 model keeps a manual adjustment. Awaiting written sign-off.
